Re: Aero-life Aeration Systems  
Enviro-Care Services

In 2003 Enviro-Care installed their new aeration systems in grease traps at both of our locations, we were very skeptical at the time. We were pumping our traps monthly but have always had problems with our drain lines backing up in one store and the odor out back or the other store has gotten really bad sometimes in the summer. We had several complaints. Since the aeration was installed we are on a twice a year pumping schedule. Pumping costs us \$250 each time so we've saved over \$6,000 on pumping since we started 14 months ago. We used to have our drain lines hydro jetted every month also, we only have do that quarterly now, another \$1,200 savings each year. The odor problems have also gone away.

We would recommend this system to anyone with a grease trap. It's a simple thing that solves lots of problems.
